

COMPARATIVE BIOCHEMISTRY AND PHYSIOLOGY

An International Journal

EDITOR: G. A. KERKUT (*Southampton*)

List of Contents and Author Index

Volume 102 Part B, 1992

PERGAMON PRESS

OXFORD · NEW YORK · SEOUL · TOKYO

Comparative Biochemistry and Physiology

Editor

Professor G. A. KERKUT, Department of Physiology and Biochemistry, University of Southampton, Southampton SO9 3TU, England (Executive Editor) (Tel.: 0703 594341; Fax: 0703 594319)

Assistant Editor

Dr I. GILES, Department of Physiology and Biochemistry, University of Southampton, Southampton SO9 3TU, England (Tel.: 0703 594341; Fax: 0703 594319)

Members of the Honorary Editorial Advisory Board

H. L. ATWOOD (Toronto)
H. BRETTING (Hamburg)
T. BRITTAIN (Auckland)
E. FLOREY (Konstanz)
M. J. GARSON (Queensland)
M. J. GREENBERG (St Augustine)
T. T. HERSKOVITS (New York)
H. HUDDART (Lancaster)
J.-M. KORNPORST (Nantes)
L. G. MAGAZANIK (St Petersburg)

C. P. MAGNUM (Williamsburg)
T. A. MCKEAN (Idaho)
D. NASSEL (Stockholm)
T. PIEK (Amsterdam)
E. SKADHAUGE (Frederiksberg)
H. TAKEUCHI (Gifu)
E. W. TAYLOR (Birmingham)
P. VANNI (Florence)
D. A. YORK (Baton Rouge)
P. F. ZAGALSKY (London)

Publishing, Subscription and Advertising Offices: *Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, England* (Tel.: 0865 794141; Fax: 0865 60285).

North America: *Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.*

Subscription Rates

Annual Institutional Subscription Rate (1992): Part A, Comparative Physiology £1020.00 (US\$1850.00); Part B, Comparative Biochemistry £1025.00 (US\$1860.00); Part C, Comparative Pharmacology and Toxicology £720.00 (US\$1305.00). Combined Subscription, £2560.00 (US\$4645.00). Two-year Institutional Rate (1992/93): Part A, £1938.00 (US\$3515.00); Part B, £1947.00 (US\$3534.00); Part C, £1368.00 (US\$2479.00). Combined Subscription, £4864.00 (US\$8825.50). Sterling prices are definitive. US dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice. Subscription rates for Japan include despatch by air and prices are available on request. Personal subscription rate for those whose library subscribes at the regular rate (1992): price on application.

Parts A and B published monthly: three volumes of each part per year, four issues per volume (Part A—1st of the month; Part B—15th of the month). Part C published monthly except in March, August and December: three volumes per year, three issues per volume.

Second Class Postage Paid at RAHWAY NJ. Postmaster send address corrections to Comparative Biochemistry and Physiology Part B, c/o Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

Back Issues

Back issues of all previously published volumes, in both hard copy and microform, are available direct from Pergamon Press offices.

CONTENTS OF 102B

Vol. 102B, No. 1

- | | |
|--|--|
| J.-Z. Pan, C. Shaw, D. W. Halton,
L. Thim, C. F. Johnston and
K. D. Buchanan | 1 The primary structure of peptide Y (PY) of the spiny dogfish, <i>Squalus acanthias</i> : immunocytochemical localisation and isolation from the pancreas |
| Sachiko Takesue, Kunio Yokota,
Shigetoshi Miyajima, Ryo Taguchi,
Hiroh Ikezawa and Yoshiki Takesue | 7 Partial release of aminopeptidase N from larval midgut cell membranes of the silkworm, <i>Bombyx mori</i> , by phosphatidyl-inositol-specific phospholipase C |
| Daphne Gail Fautin and
Jerold M. Lowenstein | 13 Scyphomedusae and their polyps are the same immuno-logically: implications for systematics |
| Masatoshi Mita and Nobuo Ueta | 15 Fatty chains of alkenylacyl, alkylacyl and diacyl phospholipids in sea urchin spermatozoa |
| Le Huu Hieu, J. Nemcsók, E. Molnár
and L. Dux | 19 Different sensitivity of the sarcoplasmic reticulum Ca^{2+} -ATPase enzyme to fluorescein-isothiocyanate in rabbit and carp muscles |
| G. Bradley, D. Litthauer and W. Oelofsen | 25 Partial characterisation of human and porcine adipose acidic protease activity |
| T. Nakano, M. Sato and M. Takeuchi | 31 Partial purification and properties of glutathione peroxidase from carp hepatopancreas |
| Patrick Gendry and Jean-François Launay | 37 Pancreatic anionic trypsin: evidence for the existence of a 30 kDa form |
| Ulrich Schraermeyer, Michael Rack
and Hennig Stieve | 43 Isolation of the rhabdomeral microvillar cytoskeleton of the crayfish (<i>Orconectes limosus</i>) photoreceptor by a crosslinking reagent |
| M. Osanai and S. Nagaoka | 49 Adenine compounds in the male reproductive tract and the spermatophore of the silkworm, <i>Bombyx mori</i> |
| J. Ramon Formas, Sonia Lacrampe
and Lila Brieva | 57 Allozymic and morphological differentiation among three South American frogs, genus <i>Eupsophus</i> (<i>E. roseus</i> , <i>E. insularis</i> and <i>E. contulmoensis</i>) |
| A. Guillou, G. Choubert and J. de la Noüe | 61 Comparative accumulations of labelled carotenoids (^{14}C -astaxanthin, ^3H -canthaxanthin and ^3H -zeaxanthin) and their metabolic conversions in mature female rainbow trout (<i>Oncorhynchus mykiss</i>) |
| K. A. Krishnan, J. A. Proudman and
J. M. Bahr | 67 Purification and characterization of chicken follicle-stimulating hormone |
| Jeremy H. A. Fields | 77 The effects of aestivation on the catalytic and regulatory properties of pyruvate kinase from <i>Helix aspersa</i> |
| Nora M. Navone, Elba S. Vázquez,
César F. Polo and
Alcira M. del C. Batlle | 83 Rhodanese and ALA-S in mammary tumor and liver from normal and tumor-bearing mice |
| Nora M. Navone, Susana G. Afonso,
César F. Polo and
Alcira M. del C. Batlle | 87 Uroporphyrinogen decarboxylase from mouse mammary carcinoma and liver of normal and tumor-bearing mouse |
| Maggie Cusack, Gordon Curry,
Heather Clegg and Geoff Abbott | 93 An intracrystalline chromoprotein from red brachiopod shells: implications for the process of biomineralization |
| Rakesh K. Srivastava | 97 Changes in polyamines during embryonic development of Atlantic salmon, <i>Salmo salar</i> |

- | | | |
|---|-----|--|
| Nget-Hong Tan and
Gnanajothy Ponnudurai | 103 | A comparative study on the electrophoretic patterns of snake venoms |
| Sai On Chan, Susanna Siu Chun Wong
and Desmond Chak Yew Yeung | 111 | Expression of c-Ki-ras in developing rat liver |
| P. F. Silveira, L. N. Schiripa
and Z. P. Picarelli | 119 | Hydrolysis of L-cystine-di- β -naphthylamide and neurohypo-
physeal peptides by the plasma of the snake <i>Bothrops jararaca</i> |
| Gheorghe Benga, Dorin Poruțiu,
Adriana Hodârău and
William Ferdinand | 123 | Ultrastructural aspects and amino acid composition of the
purified inner and outer membranes of human liver mito-
chondria as compared to rat liver mitochondria |
| Toshihide Nishimura, Yutaka Kato,
Mee Ra Rhyu, Akihiro Okitani and
Hiromichi Kato | 129 | Purification and properties of aminopeptidase C from porcine
skeletal muscle |
| Gregory R. Stuart, Brian Dixon and
Bill Pohajdak | 137 | Isolation of a putative retrovirus <i>pol</i> gene fragment from trout |
| Sau-Wah Kwan and Creed W. Abell | 143 | cDNA cloning and sequencing of rat monoamine oxidase A:
comparison with the human and bovine enzymes |
| Osamu Maeda, Takao Ojima
and Kiyoyoshi Nishita | 149 | Calpain II-like proteinase of scallop (<i>Patinopecten yessoensis</i>)
striated adductor muscle |
| Osamu Maeda, Takao Ojima
and Kiyoyoshi Nishita | 155 | Comparative studies on heat stability and autolysis of scallop
(<i>Patinopecten yessoensis</i>) calpain II-like proteinase and rabbit
calpain II |
| Hiroyuki Sumi, Kyoko Kawabe
and Nobuyoshi Nakajima | 159 | Effect of various polyamino acids and D- and L-amino acids on
the blood fibrinolytic system |
| Hiroyuki Sumi, Nobuyoshi Nakajima
and Hisashi Mihara | 163 | Fibrinolysis relating substances in marine creatures |
| Teruyuki Niimi and Toshinobu Yaginuma | 169 | Biosynthesis of NAD-sorbitol dehydrogenase is induced by
acclimation at 5°C in diapause eggs of the silkworm, <i>Bombyx
mori</i> |
| Noellette M. Conway and
Judith E. McDowell Capuzzo | 175 | High taurine levels in the <i>Solemya velum</i> symbiosis |
| T. N. Zvyagintseva, L. A. Elyakova
and V. B. Krasohin | 187 | The search for effectors of β -D-glucanases among marine
invertebrates |
| Valery M. Dembitsky, Andrey G. Kashin
and Kamen Stefanov | 193 | Comparative investigation of phospholipids and fatty acids of
freshwater molluscs from the Volga river basin |

Vol. 102B, No. 2

Mini Review

- | | | |
|--------------------------------|-----|--------------------------------------|
| D. S. Kaufman and G. H. Miller | 199 | Overview of amino acid geochronology |
|--------------------------------|-----|--------------------------------------|

General Papers

- | | | |
|---|-----|--|
| Bernard Simon, Philippe Sébert,
Christine Cann-Moisán and
Lucien Barthélémy | 205 | Muscle energetics in yellow freshwater eels (<i>Anguilla
anguilla</i> L.) exposed to high hydrostatic pressure (101 ATA)
for 30 days |
| Attilio Arillo, Federico Melodia and
Barbara Marsano | 209 | Nitrite biotransformation by mitochondria from the
earthworm <i>Eisenia foetida</i> (Savigny) |
| Elizabeth W. Bingham and
Edyth L. Malin | 213 | Alkaline phosphatase in the lactating bovine mammary gland
and the milk fat globule membrane. Release by phosphatidyl-
inositol-specific phospholipase C |

- Jacques R. Vanfleteren 219 Cu-Zn superoxide dismutase from *Caenorhabditis elegans*: purification, properties and isoforms
- Dieter Böderker and Holger Martens 231 Elevated urinary excretion of orotic acid in sheep caused by intraruminal infusion of sodium propionate
- A. H. W. Mendis, R. C. A. Thompson, J. A. Reynoldson, A. Armson, B. P. Meloni and S. Gunsberg 235 The uptake and conversion of L-[U¹⁴C]- aspartate and L-[U¹⁴C]- alanine to ¹⁴CO₂ by intact trophozoites of *Giardia duodenalis*
- Theresa J. Reape and Ann M. Burnell 241 Dauer larva recovery in the nematode *Caenorhabditis elegans*—III. The effect of inhibitors of protein and mRNA synthesis on the activity of the enzymes of intermediary metabolism in recovering dauer larvae
- Djagal W. Marseno, Kanji Hori and Keisuke Miyazawa 247 Distribution of 5'-nucleotidase in muscle of some marine fishes
- Shigeru Kimura 255 Wide distribution of the skin type I collagen $\alpha 3$ chain in bony fish
- Esteban C. Dell'Angelica, Carlos A. Stella, Mario R. Ermácora, Eugenia H. Ramos and José A. Santome 261 Study on fatty acid binding by proteins in yeast. Dissimilar results in *Saccharomyces cerevisiae* and *Yarrowia lipolytica*
- M. Wakita, N. Yamabata, Y. Kobayashi and S. Hoshino 267 Characteristics of chicken serum transferrin and immunological determination of its serum levels in dwarf chickens
- Nin-Nin Chuang, Kung-Shih Lin and Bei-Chia Yang 273 Purification and characterization of an α -glucosidase from the hepatopancreas of the shrimp *Penaeus japonicus* (Crustacea: Decapoda)
- Nin-Nin Chuang, John Darr Huang and Kung-Shih Lin 279 Comparative study of free and membrane-bound acidic β -D-glucosidase from the hepatopancreas of the shrimp *Penaeus japonicus* (Crustacea: Decapoda)
- Fulvia Basaglia, Maria Gabriella Marchetti and Carlo Cucchi 285 The effects of phenylhydrazine and cobalt chloride on the electrophoretic and isoelectric focusing behaviour of some enzymes in *Clarias gariepinus* (Clariidae, Teleostei)
- Dietmar Kültz, Ralf Bastrop, Karl Jürss and Dietrich Siebers 293 Mitochondria-rich (MR) cells and the activities of the Na⁺/K⁺-ATPase and carbonic anhydrase in the gill and opercular epithelium of *Oreochromis mossambicus* adapted to various salinities
- Liliana Busconi, Eduardo J. Folco, Claudia Studdert and Jorge J. Sanchez 303 Purification and characterization of a latent form of multicatalytic proteinase from fish muscle
- Eduardo J. Folco, Liliana Busconi, Claudia Studdert, Claudia A. Casalongue and Jorge J. Sanchez 311 Distribution of multicatalytic proteinase in fish tissues
- Nicholas J. Vietri and Willard O. Granath Jr 315 Identification, comparison and partial characterization of glycoproteins in the hemolymph of *Schistosoma mansoni* (Trematoda)-susceptible and resistant *Biomphalaria glabrata* (Gastropoda)
- Bruno Lomonte and Elena Carmona 325 Individual expression patterns of myotoxin isoforms in the venom of the snake *Bothrops asper*
- R. Lucchi, A. Poli, U. Traversa and O. Barnabei 331 Characterization of A₁ adenosine receptors in membranes from whole goldfish brain
- Richard J. Middleton and Deryck G. Walker 337 A comparison of hepatic glucokinase gene expression in high- and low-activity strains of mice

- Saburo Uchiyama, Kazumasa Isobe and Shin-ichi Nagai 343 Determination of the molecular weights of ribonuclease isozymes in a cell-free crude extract of *Dictyostelium discoideum*, by activity-staining of gels after SDS-PAGE
- Philippe Roch, Calogero Canicatti and Silvia Sammarco 349 Tetrameric structure of the active phenoloxidase evidenced in the coelomocytes of the echinoderm *Holothuria tubulosa*
- Hirosuke Oku, Eisaku Oohama, Noriyasu Yagi, Atsushi Urahashi, Junichi Nagata, Choyu Shinjyo and Isao Chinen 357 Age-related changes of the branched-chain fatty acid concentration in rat skin surface lipid
- Daniel J. Peet, Richard E. H. Wettenhall, Donald E. Rivett and Anthony K. Allen 363 A comparative study of covalently-bound fatty acids in keratinized tissues
- H. S. Yong 367 Allozyme variation in the melon fly *Dacus cucurbitae* (Insecta: Diptera: Tephritidae) from Peninsular Malaysia
- P. Legrand and P. Lemarchal 371 Stearyl-CoA desaturase activity and triglyceride secretion in isolated and cultured hepatocytes from genetically lean and fat chickens
- S. Gertler and N. M. Young 377 Thiol groups and other chemical characteristics of rat monoclonal immunoglobulin A
- Edward Forsyth Wilson, George G. Brown and Charles D. Drewes 383 Characterization of phosphorus metabolism during six stages of development in the earthworm *Eisenia foetida* using ^{31}P -NMR
- George G. Brown and Charles D. Drewes 389 ^{31}P -NMR analysis of phospholombricine and other phosphorus-containing metabolites in selected freshwater and terrestrial oligochaetes
- Pavel Uhrin and Tibor Liptaj 397 Effect of training on fibre composition and phosphate metabolites in rest measured *in vitro* in muscles of young pigs
- Patricio Meneses and Nelson Navarro 403 ^{31}P NMR phospholipid profile study of seven sea anemone species
- Andrea Santulli, Noel P. Wilkins and Vincenzo D'Amelio 409 Two tissue-specific loci for octopine dehydrogenase in *Tapes decussatus* (Bivalvia, Veneridae)
- N. Koueta and E. Boucaud-Camou 413 Changes of aspartate transcarbamylase activity in the gonad of *Sepia officinalis* L. during the sexual cycle
- Nevenka Bihari, Renato Batel and Rudolf K. Zahn 419 Fractionation of DNA from marine invertebrate (*Maja crispata*, *Mytilus galloprovincialis*) haemolymph by alkaline elution
- Douglas J. Clarke, Brian Burchell and Stephen G. George 425 Functional and immunochemical comparison of hepatic UDP-glucuronosyltransferases in a piscine and a mammalian species
- Haydée Fukuda, Sergio Paredes and Alcira M. del C. Batlle 433 Tumour-localizing properties of porphyrins. *In vivo* studies using free and liposome encapsulated aminolevulinic acid
- Mini Review**
- Y. D. Sharma 437 Structure and possible function of heat-shock proteins in *Falciparum malaria*
- Hirofumi Kanoh, Takao Kitamura and Yoshinari Kobayashi 445 A sulfated proteoglycan from the red alga *Gracilaria verrucosa* is a hemagglutinin
- Kenneth H. Lockey 451 Insect hydrocarbon chemotaxonomy: cuticular hydrocarbons of adult and larval *Epiphysa* species Blanchard and adult *Onymacris unguicularis* (Haag) (Tenebrionidae: Coleoptera)

Vol. 102B, No. 3

- Maria Consuelo Navarro,
Italo M. Cesari and R. Nino Incani
- E. Kiehl and J. D'Haese
- Moshe Tom, Milton Fingerman,
Timothy K. Hayes, Virginia Johnson,
Bella Kerner and Esther Lubzens
- Manuel B. Aguilar, L. Scott Quackenbush,
Donald T. Hunt, Jeffrey Shabanowitz
and Alberto Huberman
- Futoshi Aranishi, Kenji Hara and
Tadashi Ishihara
- Zakia El Hachimi, M'hamed Tijane,
Gérard Boissonnet, Abdelaziz Benjouad,
Michel Desmadril and Jeannine M. Yon
- Luciana C. C. Leite,
M. Fatima D. Furtado,
Tania C. Correa and Isaias Raw
- Gene A. Hines, Stephen A. Watts,
Charles W. Walker and Peter A. Voogt
- M. J. Polanco, M. T. Agapito
and J. M. Recio
- Alexander J. Szalai, M. T. Norcum,
J. E. Bly and L. W. Clem
- Alexander J. Szalai, J. E. Bly
and L. W. Clem
- Vincent M. Mann, Victor U. Nwosu,
Anne Silcox, Carolyn J. P. Jones,
Keith Burdett and Martin J. Connock
- Vincent M. Mann, Victor U. Nwosu,
Anne Silcox, Carolyn J. P. Jones,
Keith Burdett and Martin J. Connock
- J. M. Russom, G. R. Guba, D. Sanchez,
C. F. Tam, G. A. Lopez and
R. E. Garcia
- Eluid N. M. Njagi, Norah K. Olembo
and David J. Pearson
- Telma S. Alonso,
Ida C. Bonini de Romanelli,
Ana M. Roccamo de Fernández
and Francisco J. Barrantes
- L. Swevers, J. G. D. Lambert
and A. De Loof
- B. Varriale, I. Serino, S. Minucci
and G. Chieffi
- 471 Isoenzyme studies in one Brazilian and two Venezuelan strains
of *Schistosoma mansoni*
- 475 A soluble calcium-binding protein (SCBP) present in
Drosophila melanogaster and *Calliphora erythrocephala* muscle
cells
- 483 A comparative study of the ovarian proteins from two penaeid
shrimps, *Penaeus semisulcatus* de Haan and *Penaeus vannamei*
(Boone)
- 491 Identification, purification and initial characterization of the
vitellogenesis-inhibiting hormone from the Mexican crayfish
Procambarus bowieri (Ortmann)
- 499 Purification and characterization of cathepsin H from hepato-
pancreas of carp *Cyprinus carpio*
- 507 Comparison of muscle phosphofructokinase from euthermic
and hibernating *Jaculus orientalis*. Purification and deter-
mination of the quaternary structure
- 515 Characterization of the snake venoms from seven Brazilian
species of *Bothrops* by FPLC anion-exchange chromatography
- 521 Androgen metabolism in somatic and germinal tissues of the
sea star *Asterias vulgaris*
- 527 Inhibition and affinity chromatography of chicken lung angio-
tensin I-converting enzyme with captopril
- 535 Isolation of an acute-phase phosphorylcholine-reactive pen-
traxin from channel catfish (*Ictalurus punctatus*)
- 545 Chelation affects the conformation, lability and aggregation of
channel catfish (*Ictalurus punctatus*) phosphorylcholine-
reactive protein (PRP)
- 551 Subcellular fractionation evidence for a putative peroxisome-
mitochondrion attachment in the liver of normal and geneti-
cally obese (*ob/ob* and *db/db*) mice
- 561 Association of monoamine oxidase and malate dehydrogenase
with liver peroxisomes of genetically obese (*ob/ob* and *db/db*)
mice
- 573 Plasma lipoprotein cholesterol concentrations in the golden-
mantled ground squirrel (*Spermophilus lateralis*): a comparison
between pre-hibernators and hibernators
- 579 Proline transport by tsetse fly *Glossina morsitans* flight muscle
mitochondria
- 585 Polyphosphoinositide synthesis and protein phosphorylation
in the plasma membrane from full-grown *Bufo arenarum*
oocytes
- 591 On the origin of vertebrate-type steroids present in *Locusta*
migratoria: do they originate from the food?
- 601 Effect of castration and testosterone therapy on Harderian
gland protein patterns of the golden hamster (*Mesocricetus*
auratus)

- Leslie S. Indrasith and Hidetaka Hori 605 Isolation and partial characterization of binding proteins for immobilized delta endotoxin from solubilized brush border membrane vesicles of the silkworm, *Bombyx mori*, and the common cutworm, *Spodoptera litura*
- Thomas W. Keenan, C. M. Huang and Charles H. Zierdt 611 Comparative analysis of lipid composition in axenic strains of *Blastocystis hominis*
- Takao Sugiura, Hideki Matoba and Naotoshi Murakami 617 Myosin light chain patterns in histochemically typed single fibers of the rat skeletal muscle
- Inke Sunila and Christopher F. Dungan 621 Different proteins in the hemolymph sera from sarcomatous and healthy soft shell clams, *Mya arenaria* L.
- Franz-Josef Roters and Ernst Zebe 627 Proteinases of the medicinal leech, *Hirudo medicinalis*: purification and partial characterization of three enzymes from the digestive tract
- N. N. Brustovetsky, M. V. Egorova and E. I. Mayevsky 635 Regulation of oxidative activity and $\Delta\Psi$ of liver mitochondria of active and hibernating gophers. The role of phospholipase A₂
- E. V. Berdyshev, O. E. Getmanova, V. I. Svetashev and A. A. Kubanin 639 The heptadecanoic fatty aldehyde—one of the main aldehydes of the far-eastern *Bryozoa*

Vol. 102B, No. 4

Mini Reviews

- Timothy J. Beanland and Christopher J. Howe 643 The inference of evolutionary trees from molecular data
- Guido di Prisco and Maurizio Tamburrini 661 The hemoglobins of marine and freshwater fish: the search for correlations with physiological adaptation
- Zulema Coppes 673 Lactate dehydrogenase in teleosts. The role of LDH-C₄ isozyme
- Norio Suzuki and Ken-ichi Yoshino 679 The relationship between amino acid sequences of sperm-activating peptides and the taxonomy of echinoids

General Papers

- Ken-ichi Yoshino, Toshifumi Takao, Yasutsugu Shimonishi and Norio Suzuki 691 Sperm-activating peptide type-V (SAP-V), a fifth member of the sperm-activating peptide family, purified from the egg-conditioned media of the heart urchin *Brissus agassizii*
- D. A. Hudson 701 Constitutive protein secretion by guinea-pig seminal vesicle epithelial cells
- P. C. Lee and M. Struve 707 Unsaturated fatty acids inhibit glucocorticoid receptor binding of trout hepatic cytosol
- Isamu Shimizu 713 Comparison of fatty acid compositions in lipids of diapause and non-diapause eggs of *Bombyx mori* (Lepidoptera: Bombycidae)
- R. J. Pollero, M. R. González-Baró and C. Garín 717 Lipid transport in snails. Partial characterization of a high-density lipoprotein isolated from *Ampullaria canaliculata* plasma
- Carlos E. Irazú, María del R. González Baró and Ricardo J. Pollero 721 Effect of environmental temperature on mitochondrial β -oxidation activity in gills and hepatopancreas of the freshwater shrimp *Macrobrachium borellii*
- Marina T. Assakura, Maria de Fatima Furtado and Fajga R. Mandelbaum 727 Biochemical and biological differentiation of the venoms of the lancehead vipers (*Bothrops atrox*, *Bothrops asper*, *Bothrops marajoensis* and *Bothrops moojeni*)

- P. Bergamo, P. Venditti, G. Sansone,
L. Ferrara and P. Abrescia 733 Detection of a sperm-coating antigen in the semen of *Bubalus bubalis*
- G. P. Serrazanetti, L. S. Conte,
C. Pagnucco, C. Bergami and L. Milani 743 Sterol content in zooplankton of Adriatic Sea open waters
- Heddy Julistiono and Joël Briand 747 Microsomal ethanol-oxidizing system in *Euglena gracilis*. Similarities between *Euglena* and mammalian cell systems
- Antoni Polanowski, Tadeusz Wilusz,
Murray S. Blum, Pierre Escoubas,
Justin O. Schmidt and James Travis 757 Serine proteinase inhibitor profiles in the hemolymph of a wide range of insect species
- N. J. Young, P. T. Quinlan and
L. J. Goad 761 Cholesteryl esters in the decapod crustacean, *Penaeus monodon*
- J. A. J. Thompson and
A. E. Sutherland 769 A comparison of methods for sample clean-up prior to quantification of metal-binding proteins
- Florence Tromeur, Fabienne Guerard
and Yves Le Gal 773 Mucous glycoproteins from the ray *Raja batis*
- Bruno Masala, Laura Manca and
Carlo Callegarini 779 Symmetric and asymmetric tetramers, due to multiple α - and β -globin chains, account for the hemoglobin polymorphism of the Italian catfish (*Ictalurus* sp.)
- Patrick Bonnier and Jean Luc Baert 785 Vitellogenesis in the sand worm, *Nereis diversicolor*
- John Hempel, Rolf Eckey,
Diane Berie, Hana Romovacek,
Dharam P. Agarwal and
H. Werner Goedde 791 Human liver glutamic γ -semialdehyde dehydrogenase: structural relationship to the yeast enzyme
- Antimo D'Aniello, Amedeo Vetere
and Lucia Padula 795 Occurrence of free D-amino acids in the gametes, embryos, larvae and adults of the sea-squirt *Ciona intestinalis*
- Pamela Taggart and Matthew Landau 799 Characterization of a G-protein from the mandibular organ of the lobster *Homarus americanus* (Nephropidae, Decapoda)
- Shohshi Mizuta, Reiji Yoshinaka,
Mamoru Sato, Yoshiaki Itoh
and Morihiko Sakaguchi 803 Subunit composition of distinct types of collagens in the muscle of the kuruma prawn *Penaeus japonicus*
- R. G. Ackman, T. Takeuchi
and G. H. Balazs 813 Fatty acids in depot fats of green turtles *Chelonia mydas* from the Hawaiian Islands and Johnston Atoll
- Randall C. Bender, Sarah E. Fryer
and Christopher J. Bayne 821 Proteinase inhibitory activity in the plasma of a mollusc: evidence for the presence of α -macroglobulin in *Biomphalaria glabrata*
- Achal Garg, Sanja Krča, Branko Kurelec
and Ramesh C. Gupta 825 Endogenous DNA modifications in aquatic organisms and their probable biological significance
- Taufiqul Huque, Joseph G. Brand
and Joseph L. Rabinowitz 833 Metabolism of inositol-1,4,5-trisphosphate in the taste organ of the channel catfish, *Ictalurus punctatus*
- Maurice Aknin, Koffi Dogbevi,
Abdoulaye Samb, Jean-Michel Kornprobst,
Emile M. Gaydou and Joseph Miralles 841 Fatty acid and sterol compositions of eight brown algae from the Senegalese coast
- Ramiro Barcia, Izaskun Ibarguren and
Juan Ignacio Ramos-Martínez 845 Fructose-1,6-bisphosphatase in mantle of the sea mussel *Mytilus galloprovincialis* Lmk.—III. Seasonal variation of enzymatic activity
- Evaldo Reischl and Alcir Luiz Dafré 849 Glutathione mixed disulfides and heterogeneity of chicken hemoglobins

- Sunanta Ratanapo and Montri Chulavatnatol 855 Monodin-induced agglutination of *Vibrio vulnificus*, a major infective bacterium in black tiger prawn (*Penaeus monodon*)
- Yukio Naito, Ikukatsu Suzuki and Seiji Hasegawa 861 Induction of cystatin S in rat submandibular glands by papain
- M. F. Brivio, M. Pagani and G. Scari 867 Biochemical evidence of phenoloxidase activity (pro-PO system) in larvae of *Allogamus auricollis* (Insecta, Trichoptera)
- Momoyo Nakano, Shigehiro Funayama, Maria Benigna M. de Oliveira, Sung Lie Bruel and Elisa Maines Gomes 873 D-Glyceraldehyde-3-phosphate dehydrogenase from HeLa cells—1. Purification and properties of the enzyme
- Elisa Maines Gomes, Shigehiro Funayama, Maria Benigna M. de Oliveira, Sung Lie Bruel and Momoyo Nakano 879 D-Glyceraldehyde-3-phosphate dehydrogenase from HeLa cells—2. Immunological characterization
- Shin-ichi Teshima, Akio Kanazawa, Ken-ichiro Hitotsumatsu, Kui Shik Kim, Kyoichi Oshida and Shunsuke Koshio 885 Tissue uptake and bioconversion of icosapentaenoic acid and phosphatidylcholine in prawns, *Penaeus* and *Macrobrachium*
- Timothy D. Lockey and Donald D. Ourth 891 Isolation and characterization of hemolymph phenoloxidase from *Heliothis virescens* larvae

obtain a subject catalogue

Pergamon Press

Pergamon Press Ltd, Headington Hill Hall, Oxford, OX3 0BW, UK
Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, USA

Information for Contributors

1. The journal will publish papers that contain the results of original research on the biochemistry, physiology and pharmacology of animals. Particular attention will be paid to those papers in which the subject is approached from a comparative point of view.

Part C of the journal deals with the study of the action of drugs and chemicals on cells, tissues and whole animals. In particular it is concerned with the differences between species, and organs, in their responses to drugs. The section will carry papers of interest to workers on insecticides, molluscides and antiprotozoan drugs.

In addition, basic research will be published on nerve muscle transmitters, nerve/nerve transmitters and other pharmacological studies on the simpler animals. Comparative biochemical and pharmacological studies will also be published.

2. English is the preferred language for papers.

3. Original communications should be sent to the Editor:

Professor G. A. KERKUT (Comparative Biochemistry and Physiology), Department of Physiology and Biochemistry, University of Southampton, Southampton SO9 3TU, England.

4. Submission of a paper to the Editor will be held to imply that it has not previously been published: that it is not under consideration for publication elsewhere; and that if accepted for *Comparative Biochemistry and Physiology* it will not be published elsewhere in the same form, in English or in any other language, without the written consent of the Editor.

5. The typescript, in general, should follow the conventional form—introduction and literature, materials and methods, results, discussion, summary and references. The paper should be prefaced by an abstract appearing immediately after the title and the author's name. *This abstract should consist of numbered sentences that summarize the main facts and conclusions of the paper. Not more than 100 words should be used, and 50 words are preferable.*

6. Communications should be in the form of typescript, with the lines double spaced on one side of paper (approx. 10 in. × 8 in.) and a left-hand margin of not less than 1½ in. The submission of two typescripts (an original and a carbon copy) will facilitate refereeing; if only one is submitted, it should be the original. In either case, the author should retain a copy for his own use.

7. Authors are requested to keep their communications as concise as possible. **To conserve space, the author should indicate those parts of the paper that might be printed in small type.** Footnotes should be avoided and italics should not be used for emphasis. A running head (shortened title at the top of each right-hand page of an article) of not more than 45 letters and spaces should be supplied for papers with long titles.

8. In general it is not necessary to publish all the individual results of replicated experiments. A statement of the number, their mean value, and some appropriate measure of their variability is usually sufficient. The methods of an analysis followed should be indicated, but statistical details such as tables of analysis of variance should be given only if they are relevant to the discussion. A statement that the difference between the mean value of two groups is statistically significant should include an indication of the level of significance attained.

9. In the interest of economy, and in order to avoid the introduction of errors, tables will be reproduced by photo-offset means directly from the authors' typed manuscript, and the following points should therefore be observed during their preparation:

(a) **Tables should be prepared for direct camera copy.** Refer to current tables in the journal, and arrange the spatial layout of your table to conform.

(b) Type should be clear and even.

(c) Tables, headings and legends should be typed on a separate sheet. Indicate on a Xerox copy of the table where the headings and the legends should be inserted.

(d) Insert heavy rules at the head and foot of each table, and fine rules below column headings.

(e) Leave the *minimum* space required to avoid confusion between columns.

(f) Genus and species names, and other words normally italicized, should be typed in italics or underlined.

For guidance on how best to prepare tables for photographic reproduction, and in case of difficulty, please contact the Photoreprographic Section of your institution who will give you assistance.

10. All necessary illustrations should accompany the typescript but should not be inserted in the text. All photographs, charts and diagrams are to be referred to as "Figs", and they should be numbered consecutively in the order in which they are referred to in the text.

(a) **Photographs, including photomicrographs, should be glossy prints and should be restricted to the minimum necessary.** Each should have, lightly written on the back, the author's name, the figure number and an indication of which is the top of the picture. Lines or lettering to appear on the photographs should be in **good quality stencil**.

(b) **Captions to figures** should be typed consecutively on a separate page or pages at the end of the paper. The caption or legend should be sufficient so that the tables or figures are intelligible without reference to the text. The same data should not be published in tables and figures.

(c) Authors are requested not to submit sheets of illustrations larger than foolscap size.

(d) Authors should note that all illustrations, diagrams and graphs should have the FINAL labelling ready for press.

11. The full Latin name of all animal species used in the investigation must be given.

12. Full references should be given at the end of the paper in alphabetical order and should include the names of the authors, the date of publication, the full title of the paper, title of the journal, volume number and the first and last page numbers. References to books should include the number of the edition, volume, relevant pagination, the name of the publisher and the town of publication. In the text a reference should be quoted by the author's name and the date placed in parentheses, as, for example: Smith (1960). Examples of full references are given below:

Ashby W. (1943) Carbonic anhydrase in mammalian tissue. *J. biol. Chem.* **151**, 521–527.

Kogh A., Warren B. and Holt C. (1977) *Physiology of Capillaries*, 2nd edn, Vol. 1, pp. 67–75. Pergamon Press, Oxford.

13. Abbreviations. Only standard abbreviations should be used. Where specialized terms are given, a specific abbreviation should be indicated as a footnote to the paper.

14. Page proofs will be sent to the author, or to the first-mentioned author in papers of multiple authorship, for correction. Reprints and copies of the issue (at a specially reduced rate) may be purchased using the order form which will accompany the proofs.

15. **Corrections to the proofs must be restricted to printer's errors only. Other than those, substantial alterations may be charged to the author.**

16. **The original manuscript and diagrams will be discarded one month after publication unless the Publisher is requested to return original material to the author.**

**Reproduced with the permission of Pergamon Press Inc., by University
Microfilms Inc. Duplication or resale without permission is prohibited.**
